How to apply for a National Fish and Wildlife Foundation Grant

The National Fish and Wildlife Foundation funds projects to conserve and restore fish, wildlife, and native plants through matching grant programs. The Foundation awards matching grants to projects that address priority actions promoting fish and wildlife conservation and the habitats on which they depend. The Foundation seeks to fund projects that proactively involve other conservation and community interests, leverage Foundation-provided funding, and evaluate project outcomes. Federal, state, and local governments, educational institutions, and nonprofit organizations are welcome to apply for matching grants.

The Foundation does not fund political advocacy or litigation of any kind, shortfalls in government agency budgets, general administrative overhead or indirect costs, multi-year grants (though recipients may reapply) or basic research (including graduate research).

The Foundation awards matching grants utilizing federal funds provided by annual congressional appropriations and agreements with several federal agencies. The Foundation also receives and awards contributions from select foundations, corporations and other nonfederal entities.

Please visit the Foundation's website at www.nfwf.org for information on the grant application process, including upcoming deadlines and current grantmaking guidelines.
