

NFWF | Gulf Environmental Benefit Fund

RECIPIENTS

The Nature Conservancy
Town of Dauphin Island

AWARD AMOUNT

\$3,568,600

LOCATION

Dauphin Island, Alabama

AWARD DATE

November 2016

PROGRESS UPDATE

Acquisition has been completed and is now closed. Contract for restoration and management is being finalized and work should begin shortly. (August 2017)

ALABAMA

Dauphin Island Conservation Acquisition

This project proposes the acquisition of approximately eight acres of remaining undeveloped beachfront (1,200 linear feet) on a mid-island section of Dauphin Island. This primary barrier island provides important nesting, loafing, stopover and foraging habitats for a variety of coastal birds, shorebirds, neotropical migrants and other avian species, as well as nesting habitat for endangered sea turtles.

Dauphin Island was recently named as a Globally Important Bird Area, and preservation of this unique parcel will ensure that critical beachfront habitat will be protected for future generations. In addition to the acquisition, funding is included to design and construct a dune walkover and fencing to protect habitat while allowing limited and appropriate public access.

Least terns: Credit iStock

Dauphin Island provides critical habitat for beach nesting birds, such as the least terns pictured above.

The Gulf Environmental Benefit Fund, administered by the National Fish and Wildlife Foundation (NFWF), supports projects to remedy harm and eliminate or reduce the risk of harm to Gulf Coast natural resources affected by the 2010 Deepwater Horizon oil spill.
