ALABAMA

Mobile County Conservation Acquisition

This project expanded the Mobile County Commission’s investment in habitat conservation and restoration by acquiring and conserving a 233-acre parcel located on Mobile Bay near the mouth of Fowl River. The parcel contains approximately 90 acres of brackish marsh habitat and transitional upland habitat with a high diversity of plants, birds and aquatic species. Funding was utilized to complete due diligence and acquisition of the parcel, and the development and implementation of a conservation stewardship and management plan.

With over 4,000 feet of frontage on Mobile Bay and Old Fowl River, the parcel is one of the largest, unprotected marsh habitats on the Bay’s western shore. It contains both high quality tidal marsh habitat and a buffer of old growth hardwood forest. This project also addressed a key goal of the 2013-2018 Comprehensive Conservation Management Plan (CCMP) for the Mobile Bay Estuary: Improving ecosystem function and resilience of the Mobile Bay estuary through protection, restoration and conservation of habitats.

AT A GLANCE

RECIPIENTS: Mobile County Commission

AWARD AMOUNT: \$4,217,803

LOCATION: Southeastern Mobile County

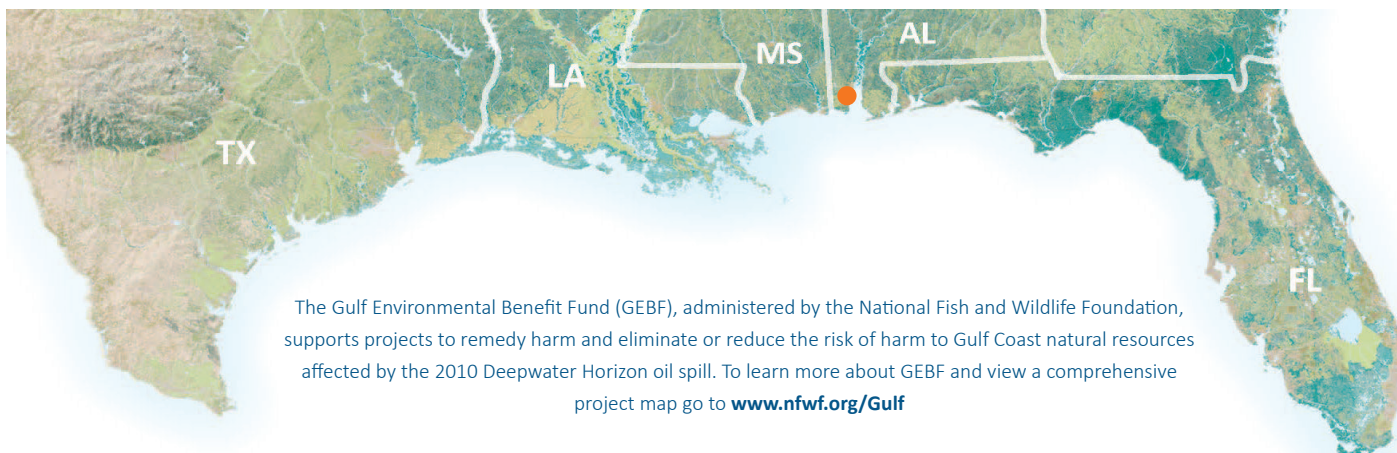

AWARD DATE: November 2015

STATUS: Closed

PROGRESS UPDATE: Project closed December 2018.

The 223-acre property has long been a high priority target for conservation and includes significant high quality acreage of both tidal marsh and maritime forest, as pictured above.

The Gulf Environmental Benefit Fund (GEBF), administered by the National Fish and Wildlife Foundation, supports projects to remedy harm and eliminate or reduce the risk of harm to Gulf Coast natural resources affected by the 2010 Deepwater Horizon oil spill.
