ABOUT NFWF

Chartered by Congress in 1984, the National Fish and Wildlife Foundation (NFWF) protects and restores the nation's fish, wildlife, plants and habitats. Working with federal, corporate and individual partners, NFWF has funded more than 5,000 organizations and generated a total conservation impact of \$6.8 billion.

Adult monarch on clover.

BACKGROUND

The National Fish and Wildlife Foundation (NFWF) administers the Monarch Butterfly and Pollinators Conservation Fund to protect, conserve and increase habitat for the monarch butterfly and other pollinators. The program is a public-private partnership with funding and other support from Bayer Crop Science, BNSF Railway, Shell Oil Company, the USDA's Natural Resources Conservation Service, U.S. Forest Service, and U.S. Fish and Wildlife Service.

The Monarch Butterfly and Pollinators Conservation Fund invests in projects that:

- Support implementation of technical assistance to increase pollinator conservation practices on private working lands
- Improve the availability of high-quality pollinator habitat

ACCOMPLISHMENTS

Since 2015, the Monarch Butterfly and Pollinators Conservation Fund has awarded approximately \$16.8 million to 109 projects that are helping conserve and recover the imperiled monarch butterfly and other pollinators. Grantees have matched this investment with an additional \$27.8 million, for a total on-the-ground impact of more than \$44.6 million.

This investment has provided support for the:

- Restoration/enhancement of 336,000 acres
- Propagation of 931,100 native milkweed seedlings
- Collection of 2,500 pounds of native milkweed seeds
- Coordination of 1,570 workshops and meetings
