ABOUT NFWF

Chartered by Congress in 1984, the National Fish and Wildlife Foundation (NFWF) protects and restores the nation's fish, wildlife, plants and habitats. Working with federal, corporate and individual partners, NFWF has funded more than 6,000 organizations and generated a total conservation impact of \$7.4 billion.

MISSION

Bumblebee

The Southeast Michigan Resilience Fund is a public–private partnership working to help increase the resilience of communities and natural resources in Southeast Michigan by reducing the impact of stormwater, improving water quality, enhancing habitat, and increasing the accessibility and usability of public green space and natural areas.

Grants are awarded in two categories:

Expanding green stormwater infrastructure and improving public space: improving stormwater capture and storage to reduce runoff, combined sewer overflows, basement backups and flooding.

Enhancing habitat quality, connectivity and accessibility: improving the quality and connectivity of in-stream, riparian, upland, and wetland habitats throughout Southeast Michigan.

The fund seeks to award grants that achieve multiple benefits, focusing investments on projects that prioritize equity and inclusion and meaningfully engage and benefit communities that have historically been underrepresented and underserved.

PROGRAM ACHIEVEMENTS

In the first four years of the fund, 28 total projects were selected to receive \$6.1 million. The grants awarded will leverage \$7 million in matching contributions to generate a total conservation impact of more than \$13.1 million. These investments resulted in:

11 MILLION GALLONS

of stormwater storage added

36,800 PEOPLE reached through engagement or education **870 ACRES** of wildlife habitat restored or enhanced

40 PUBLIC ACCESS POINTS to natural areas developed or improved

2,300 TREES PLANTED to improve urban air and water quality
