ABOUT NFWF

Chartered by Congress in 1984, the National Fish and Wildlife Foundation (NFWF) protects and restores the nation's fish, wildlife, plants and habitats. Working with federal, corporate and individual partners, NFWF has funded more than 6,000 organizations and generated a total conservation impact of \$7.4 billion.

Monarch butterfly on milkweed

BACKGROUND

The National Fish and Wildlife Foundation (NFWF) administers the Monarch Butterfly and Pollinators Conservation Fund to protect, conserve and increase habitat for the monarch butterfly and other pollinators. The program is a public-private partnership with funding and other support from Bayer Crop Science, Shell USA, The Scotts Miracle-Gro Foundation, U.S. Fish and Wildlife Service, USDA's Natural Resources Conservation Service, U.S. Forest Service and Bureau of Land Management.

The Monarch Butterfly and Pollinators Conservation Fund invests in projects that:

- Improve the availability of high-quality pollinator habitat
- Support implementation of technical assistance to increase pollinator conservation practices on private working lands

ACCOMPLISHMENTS

Since 2015, the Monarch Butterfly and Pollinators Conservation Fund has awarded approximately \$19.7 million to 123 projects that are helping conserve and recover the imperiled monarch butterfly and other pollinators. Grantees have matched this investment with an additional \$32.3 million, for a total on-the-ground impact of more than \$52 million.

This investment has provided support for the:

- Restoration/enhancement of 352,800 acres
- Propagation of 1.1 million native milkweed seedlings
- Collection of 3,000 pounds of native milkweed seeds
- Coordination of 1,600 workshops and meetings
