2023 Bats for the Future Fund Objectives

- Prevent exposure and/or enhance ability to withstand WNS
- Help bat populations recover
- Support innovative and collaborative research leading *directly to development and deployment* of treatments, tools or strategies

Credit: Ann Froschauer, USFWS

BFF Epidemiological Focus

Note: Map is illustrative, not definitive

Program Priorities: Overarching

- Implement strategies that will have a meaningful impact on survival of bat populations
- Adaptive implementation of conventional and/or experimental management actions with a sound study design
- The most competitive proposals will aim to implement treatments and management solutions to minimize the short and long-term impacts of the disease and encourage recovery in persisting populations
- Cross-disciplinary approaches and collaborations are encouraged

Program Priorities: Two Categories

- Deliver treatments or implement management tools and strategies that **prevent exposure of bats to infectious Pd or improve survival from WNS**. Sound study design to monitor/evaluate results
- Deliver treatments or implement management tools or habitat conservation strategies in the field that help WNS-affected bat populations to **recover from the impacts of WNS**. Research needs to show path to implementation

Community Impact and Engagement

- Projects that incorporate outreach to communities, foster community engagement and pursue collaborative management leading to measurable conservation benefits are encouraged.
- When possible, projects should be developed through community input and co-design processes. Additionally, projects should engage community-level partners (e.g., municipalities, NGOs, community organizations, community leaders) to help design, implement, and maintain projects to secure maximum benefits for communities, maintenance, and sustainability post-grant award.

All Project Metrics

- # of sites protected (i.e., treated)
- # of sites that remain uncontaminated
- # of sites w/persistent populations resulting from proposed actions
- # of individuals protected (i.e., receiving treatment)
- Mortality rate
- # of species benefitting *directly* from project
- Fungal load rate
- Acres under improved management
- # of sites being monitored
- # of studies used to inform management

Metrics: Preventing exposure of bats to infectious *Pd*

- # of sites protected (i.e., treated)
- # of sites that remain uncontaminated
- # of sites w/persistent populations resulting from proposed actions
- # of individuals protected (i.e., receiving treatment)
- Mortality rate

Permits and Approvals

Regulatory Compliance

Proposals must show planning for, knowledge about and secure compliance with federal, state and local law and regulation

TIPS

- Start pre-consultations with relevant agencies as soon as possible
- Secure landowner permission and document this (via email or letter)
- Plan and budget time and resources needed to obtain necessary approvals in BFF workplan and budget
- Make sure the “Permits” section of online application is complete
- Review article [*A Decision Support Tool for Determining Federal Regulatory Authority over Products for Vertebrate Animals*](#) (link in RFP)
- Consider and address state and local regulations
- Refer to NEPA, ESA, and NHPA templates found at www.nfwf.org/bats
