

## **Applicant Questions and Responses**

### **Request for Proposals: Fisheries Innovation Fund: Contract to Measure Fisherman Well-being and Dissemination of Innovative Fisheries Solutions in Alaska**

**4/24/2023**

#### **Can you please clarify what falls within the 5-page limit? Does this include past performance and resumes?**

The proposal narrative should be a concise (5-page limit) description of the work plan and summary of the qualifications of proposed personnel and the Offeror's past performance, including a list of recent (last 2-5 years) accomplishments and previous services related to the technical expertise offered.

Resumes (or Vitae) and references do not count towards that 5-page limit. Information regarding past performance that is necessary for NFWF to evaluate an offeror with their given references can be included with those references, and not count towards the 5-page limit.

#### **If Offerors propose GSA rates as the fully loaded labor rates in the budget, are they still required to breakout margin, revenue, costs, and profit percentages referenced in the budget template, given that the federal government has deemed these rates fair and reasonable?**

Offerors who propose GSA labor rates are not required to provide any further breakdown of those rates.

#### **Can NFWF provide an estimate of the budget level envisioned for this role?**

NFWF is unable to provide specific cost estimates. Offerors should prepare the budget based on the estimated level of effort required to complete the tasks in the RFP. Offerors should account for the fact that the survey has already been developed and implemented in other regions. Additionally, NFWF expects a push-to-web survey with no necessary field or dock-side components.
