# EMR GRANTS PROGRAM

2018 request for proposals

## www.nfwf.org/fisheriesfund

## **EMR GRANTS PROGRAM - ELIGIBILITY**

## Eligible

- Non-Profit Organizations
- Non-Federal Government Agencies
  - State
  - Local
  - Municipal
- Unincorporated Individuals
- Tribal Governments
- Regional Fisheries Commissions
- Educational Institutions
- Businesses
- International Organizations

## Ineligible

- U.S. Federal Government Agencies
  - Including the Fisheries
     Management Councils

## EMR Grants Program – Match Requirement

- 1:1 non-federal match is required
  - Ex: A project requesting \$50,000 is required to provide \$50,000 in non-federal matching contributions

- Types of Match
  - In-kind (Ex: staff time, materials supplies, unrecovered indirect costs)
  - Cash

## **EMR GRANTS PROGRAM - ELIGIBILITY**

## **All U.S. Fisheries Eligible to Apply**

Commercial or Recreational Sectors State or Federal Fisheries

## **EMR Grants Program – Project Scale**

In addressing program priorities, projects will either:

- 1 Develop or pilot innovative ideas
- 2 Implement a proven innovation at-scale

#### **Eligible:**

- The Great Lakes
- Puerto Rico
- U.S. Virgin Islands
- Guam
- American Samoa
- Commonwealth of the Northern Mariana Islds.

#### **Ineligible:**

Freely Associated States

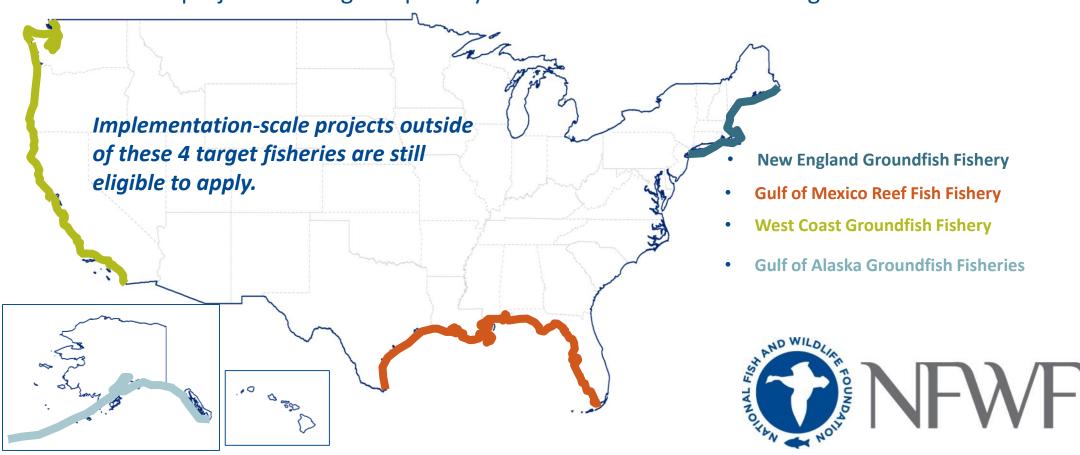

## **EMR Grants Program – Project Scale**

If project aims to...

2 Implement a proven technology at-scale

... project will be given priority if it occurs within one of 4 target fisheries.

# QUESTIONS?

Photo Credit: Alaska Sustainable Fisheries Trust

## EMR Grants Program – 2018 Program Priorities

- 1. E-technology in fishery data collection that supports fisheries conservation and management.
- 2. Modernize data management systems to reduce costs and improve the consistency, interoperability, quality and/or usability of information collected using e-technology.

## EMR Grants Program – 2018 Program Priorities

E-technology in fishery data collection...

## Implement electronic monitoring and reporting and fishery information system improvements

Projects that catalyze the adoption of electronic technology consistent with the NOAA Fisheries Regional Electronic Technology Implementation Plans.

## EMR Technologies for small, fixed gear boats and charter for-hire recreational vessels

Projects that contribute to improved fisheries management. Examples can include projects that collect catch or discard data.

#### **Develop regional-scale strategies**

Projects that develop and implement regional-scale electronic monitoring and reporting strategies. Examples could include fleet-wide solutions that have broad footprints that demonstrate coordination with federal and state fishery management agencies.

#### Improve reporting and monitoring of fisheries

Projects that advance broad level implementation of the Regional Electronic Technology Implementation Plans. Examples could include incentives for fishermen participation or outreach to encourage adoption of ET.

## EMR Grants Program – 2018 Program Priorities

Modernize data management systems...

### **Data visioning and coordination**

Projects that develop fishery or region-wide strategies for e-technology (e.g. data visioning plans), identify needs and solutions (e.g., financing)

### **Data management**

Includes automation, quality management, data integration or projects that improve the utility and cost-effectiveness of e-technology

#### Data uses

Projects that make it easier for scientists to support use of data in stock or ecosystem assessments, address data needs of commercial and recreational fishermen, support management and compliance, advancing data transferability, and test solutions to data availability

#### **Communicating ET Advancements**

Projects that provide a framework for communicating data modernization advancements and lessons learned across fisheries and regions.

## QUESTIONS?

Photo Credit: Midwater Trawlers Cooperative

## EMR GRANTS PROGRAM – 2018 RFP RECAP

#### **2018 RFP**

#### **PRIORITIES**

- E-technology for fishery data collection
- Modernize fishery data management systems

#### **ELIGIBILITY**

- All U.S. fisheries eligible
- Seeking both technology development & implementation
- Implementation projects will be prioritized if they occur within one of 4 target fisheries:
  - New England Groundfish Fishery
  - Gulf of Mexico Reef Fish Fishery
  - West Coast Groundfish Fishery
  - Gulf of Alaska Groundfish Fisheries
- 1:1 non-federal match required

## Fisheries Innovation Fund

According to the National Oceanic and Atmospheric Administration (NOAA), commercial and recreational fisheries had combined sales impacts of over \$208 billion in the United States in 2015. However, some U.S. fisheries are struggling, both biologically and economically. As of 2017, NOAA reported that 35 stocks are categorized as overfished and 30 are categorized as subject to overfishing.

The Fisheries Innovation Fund releases two requests for proposals (RFPs) each year to work towards sustainable fisheries in the United States: a Fisheries Innovation Fund RFP and an Electronic Monitoring and Reporting Grant Program RFP.

## Electronic Monitoring and Reporting 2018 Request for Proposals

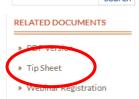

Applicant Webinar: Monday, June 18th 2018 at 3:00 PM Eastern Time Full Proposal Due Date: Monday, July 9th 2018 by 11:59 PM Eastern Time

#### **OVERVIEW**

The National Fish and Wildlife Foundation (NFWF) will award grants that catalyze the implementation of electronic technologies (ET) for catch and compliance monitoring and improvements to fishery information systems in U.S. fisheries. We anticipate awarding up to \$3.9 million through this solicitation.

The Electronic Monitoring and Reporting (EMR) Grant Program will advance the National Oceanic and Atmospheric Administration's (NOAA) sustainable fisheries goals to partner with fishermen and other stakeholders, state agencies and Fishery Information Networks to systematically integrate technology into fisheries data collection and observations as well as streamline data management and use for fisheries management. Specifically, the EMR Grant Program will solicit proposals that develop and implement promising ET that improve the timeliness and quality of fisheries data; expand access and availability of data; increase knowledge of fisheries for management, industry and science purposes; improve regional data management systems and data interoperability; and empower fishermen and other citizens to become more actively involved in the data collection process.

The EMR Grant Program was created through a partnership with NOAA, with additional support from the Kingfisher Foundation.

Log Out

document with an explanation in its place. To create your narrative document, begin by downloading the template provided below, and saving it to your computer. Use the template to create and save your narrative document on your computer.

Follow these steps to download and create your narrative document:

- 1. In the Upload Checklist below, click the Template link for the document you want to create, and save the template file to your computer. This is a MS Word document.
- 2. Work within this template and save it to your computer.

To attach/upload your document(s) to this task:

Unload Checklist

- 3. In the Uploads section below, select the appropriate upload type from the Choose Upload Type drop-down list and click Add Files.
- 4. Select the file or files to upload from your computer and return to this page.
- 5. Click **Start** to the right of the file that you want to upload. The system will upload the document and display it in the Uploads list. If the Status does not display, wait 10 seconds and refresh the page. When complete, the Status will read "Successfully validated and converted file." **Note that the following Upload Types are not included in the Full Proposal Summary PDF and therefore are not converted: IRS Form 990, GAAP Audited Financial Statements, A-133 Audit, Indirect Rate Agreement.**
- 6. Once your document is uploaded, you may view it by clicking the file name or the name of the converted PDF (if applicable). To re-upload a document, click **Delete** to the right of the document and start with Step 3 above. When you are finished, click **Continue** to move to the next page in this submission.

Click Help for examples and instructions specific to this Uploads section.

NOTE: You must enable pop-ups to use this system. If a link does not open please try holding the Shift or Control (CTRL) key on your keyboard while clicking on the link, which may tell a pop-up blocker to allow the link to open. Click here for more information.

# Full Proposal Narrative

## 1. Activities

Use formatting to specifically call out primary activities

## 2. Outcomes

- Multi-year projects need implementation milestones for each year of the project period
- 3. Project Metrics
- 4. Project Team
- 5. Photos
- 6. Other (Optional)

#### Full Proposal Project Narrative

Instructioner: Save this document on your computes and complete the nametries in the format provided. The final nametries should not exceed eight (5) pages, do not debte the headings provided below. Once complete, upload this document into the entire application as instructed.

- Activities: List the main activities that will be employed through the grant with distinct headings and disherate on the
  methodology and the expected progress within the grant period. These headings will be used as the format for interior
  and final progress reporting. Please link all activities to expected a steemer(s) of the project and describe here they
  relate to established place (management, conservation, recovery, etc.) and priority conservation needs in the specific
  project location.
- 2. Outcome(s): Enhance on the outcome(s) numeration previously in the application, discuss what makes this outcome(s) achievable and important. Outcomes should be specified and measurable. Outcomes that will not be achieved within the grants before discussion of the project grants have delable to described. If the project period is 18 mentile a balleted last of annual militations to word progress to externes is required.
- Tracking Metrics: Indicate hew the project will mentorisases progress on the metrics selected previously in the application. Please note any challenges or limitations anticipated with tracking the metrics.
- 4. Project Team: List key individuals and describe their qualifications relevant for project implementation.
- 5. Representative Project Photas: Via the Uplands section of the grope al., please include 1-5 photos of the project location or satisface. Photos should be numbered 1-5 and require a minimum resolution of 300 dpi. For each upleaded photo, provide a photo coefficiand bird description below.

Photo 1:

Photo 2 Photo 3

Photo 4

Photo 4

Example — Photo 1: John Smith, NFWF. Blacks of the controlled science he addressed by plantings.

 Other (Optional): Provide any further information important for the review of this proposal. Project site maps and letters of support are preferred but not required.

#### Electronic Monitoring and Reporting Grant Program Full Proposal Project Narrative

**Instructions:** Save this document on your computer and complete the narrative in the format provided. The final narrative should not exceed six (6) pages. Please retain the outline format below, but you may delete the instructions associated with each element. Once complete, upload this document to the online application as instructed on Easygrants.

## Part I – Please provide a brief description of your project by completing each of the following sections in no more than 3 sentences.

- a. Priority Addressed: Briefly describe how the proposal will advance the implementation of priorities identified in the NOAA Regional Electronic Technology Implementation Plans. If the proposal addresses the Automated Catch Accounting and/or Data Storage & Management innovation priorities listed in the RFP, please indicate that here.
- b. Fishery: Indicate which fishery or fisheries your proposal will focus upon.
- c. Participants: Describe the industry participants that will be directly involved in the project activities described below, including – where appropriate – the number of fishermen, vessels, sectors, fishing communities, etc.
- d. Data Visioning: If applicable, proposals should explain how projects will accomplish the goals of ET Regional Implementation Plans or other regional data visioning plans.

### Part II - Detail the proposed activities, outcomes, and metrics associated with your project.

- Activities: Using distinct headings, list the main activities that will be employed through the grant, elaborating
  on the methodology and expected progress within the grant period. These headings will be used as the format for
  interim and final progress reporting. Please link all activities to expected outcome(s) of the project and detail –
  where appropriate how they relate to and advance implementation strategies outlined in the Regional Electronic
  Technology Implementation Plans.
- 2. Outcome(s): Elaborate on the outcome(s) summarized previously in the application; discuss what makes stated outcome(s) achievable and important. Outcomes should be specific and measurable. Long-term outcomes that will not be achieved within the grant period but are anticipated as a direct result of the grant should also be described. If the project period is greater than 18 months, a bulleted list of annual milestones toward progress to outcomes is required.
- 3. Tracking Metrics: Clearly explain how the project will monitor and assess progress toward the metrics selected previously in the application, noting any challenges or limitations anticipated with tracking these metrics. Please use this section to elaborate on any project-specific metrics not selected previously in the application.
- 4. Project Team: List key individuals and describe their qualifications relevant for project implementation.
- Representative Project Photos: Via the Uploads section of the proposal, please include 1-5 photos of the project location or activities. Photos should be numbered 1-5 and require a minimum resolution of 300 dpi. For each

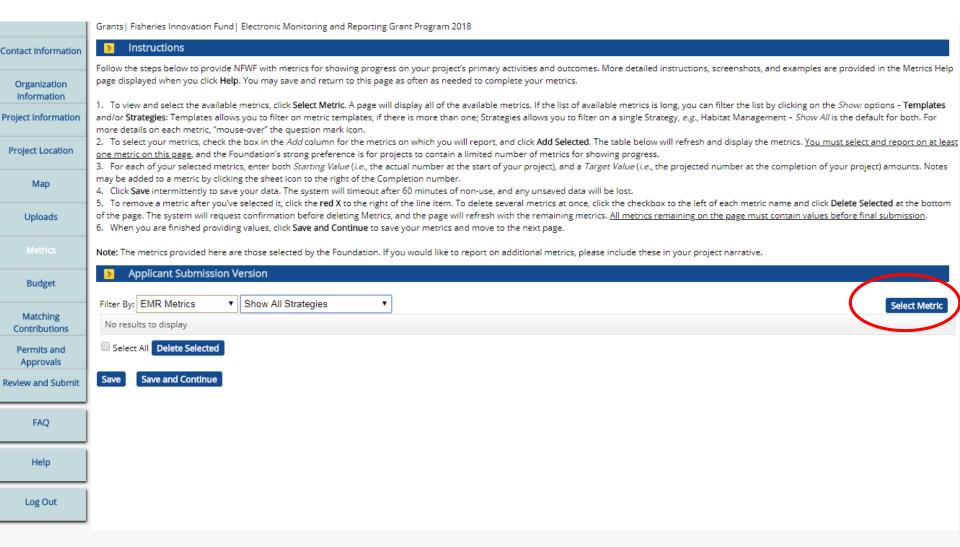

# Tips for writing your full proposal narrative

Photo Credit: South Carolina Department of Natural Resources

- Don't make reviewers work too hard.
- Show clear links between the goals/plan, threats and activities.
- Be specific.
- Reference models, past experience or outside expertise that will lead to successful implementation.
- State the hurdles/challenges and how you will address them to reduce risk.
- Demonstrate how the outcomes of your project will be sustainable.
- Have realistic goals and show how you will measure them or progress to them within the Period of Performance.

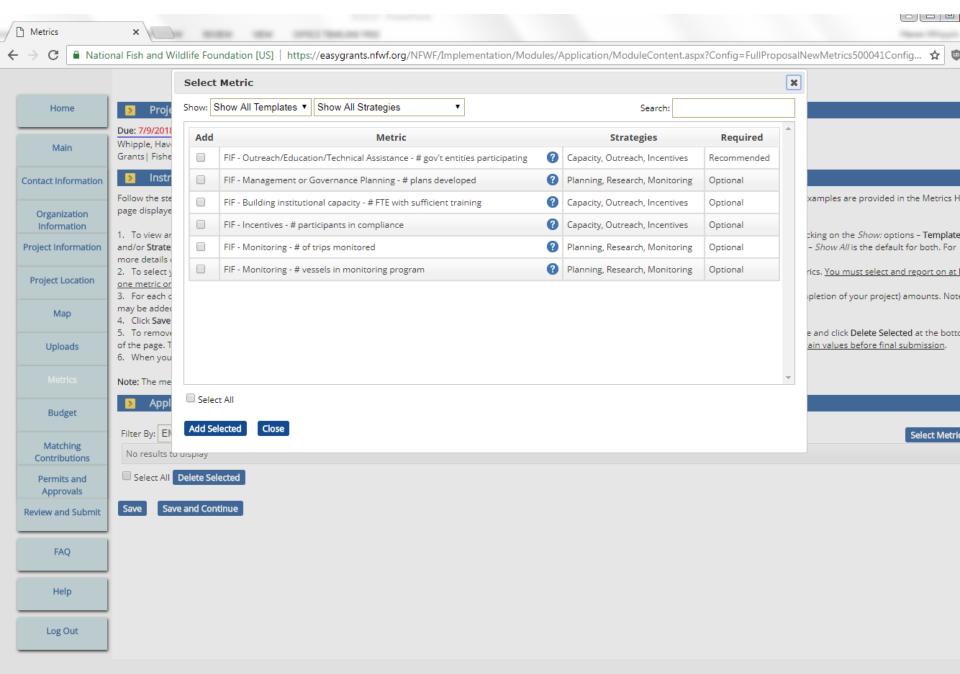

For Technical assistance, please contact us via e-mail or phone 202-595-2497. Download Adobe Reader

Powered by Easygrants<sup>TM</sup> v9.5.0

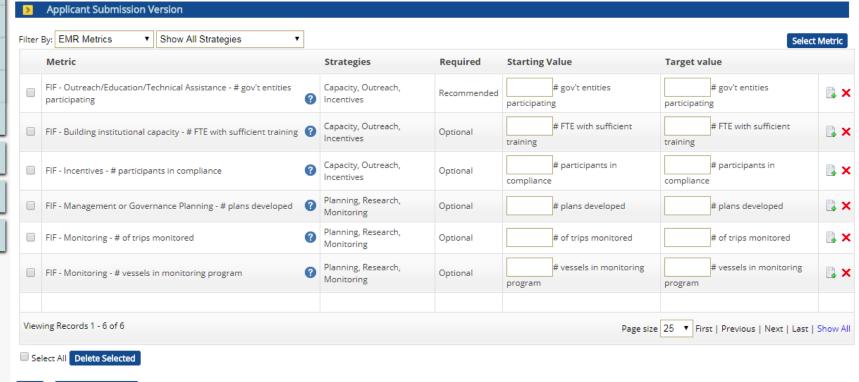

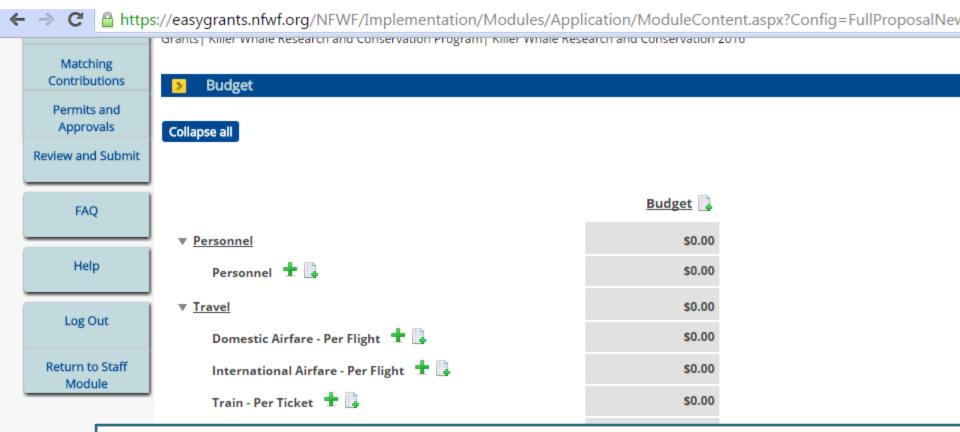

Save and Continue

Follow the steps below to provide NFWF with metrics for showing progress on your project's primary activities and outcomes. More detailed instructions, screenshots, and examples are provided in the Metrics Help page displayed when you click Help. You may save and return to this page as often as needed to complete your metrics.

- 1. To view and select the available metrics, click Select Metric. A page will display all of the available metrics. If the list of available metrics is long, you can filter the list by clicking on the Show: options Templates and/or Strategies: Templates allows you to filter on metric templates, if there is more than one; Strategies allows you to filter on a single Strategy, e.g., Habitat Management Show All is the default for both. For more details on each metric, "mouse-over" the question mark icon.
- 2. To select your metrics, check the box in the Add column for the metrics on which you will report, and click Add Selected. The table below will refresh and display the metrics. You must select and report on at least one metric on this page, and the Foundation's strong preference is for projects to contain a limited number of metrics for showing progress.
- 3. For each of your selected metrics, enter both Starting Value (i.e., the actual number at the start of your project), and a Target Value (i.e., the projected number at the completion of your project) amounts. Notes may be added to a metric by clicking the sheet icon to the right of the Completion number.
- 4. Click Save intermittently to save your data. The system will timeout after 60 minutes of non-use, and any unsaved data will be lost.
- 5. To remove a metric after you've selected it, click the red X to the right of the line item. To delete several metrics at once, click the checkbox to the left of each metric name and click Delete Selected at the bottom of the page. The system will request confirmation before deleting Metrics, and the page will refresh with the remaining metrics. All metrics remaining on the page must contain values before final submission.
- 6. When you are finished providing values, click Save and Continue to save your metrics and move to the next page.

Note: The metrics provided here are those selected by the Foundation. If you would like to report on additional metrics, please include these in your project narrative.
